To whom it may concern:

I am offering engineering services to all of the businesses in north Brevard. I believe my skills and experience make me an excellent investment for your company. I have spent over 25 years doing a variety of engineering from embedded systems to inventory management to smartphone apps. In addition, I developed business skills in my years as a self-employed contractor. Recently, I've also sharpened my business skills by starting my own engineering firm 4 years ago and I'm ready to become a strong producer for your company. Finally, management of my father's caregivers over the last 3 years has honed my organizational and interpersonal skills.

Because of my wide range of experience I can replace an entire engineering team. I can perform firmware, digital electronics, power electronics and mechanical design tasks. And as you can see from my resume I strongly believe in team building. I look forward to meeting you and your team so that we can develop a working relationship that is mutually beneficial.

I can provide these services for you as either an employee or as a contractor. I know my enthusiasm for work, combined with my relevant educational and professional credentials, will help me contribute meaningfully to your organization.

I look forward to the opportunity to discuss my potential fit for any needs you have by phone or in person at your convenience.

Thank you.

Sincerely,

Daniel Kenney
